Table 8
Severity of Collisions and Type of Injury by Month: 2004

In 2004, July had the highest number of fatal collisions. January, November, and December had the highest number of total collisions. Collisions occurring in the winter months are more likely to be attributed to severe weather such as ice and snow; however, these collisions tend to be less severe as people generally slow down and are more cautious when driving in adverse weather conditions.

Collisions by Day of the Week

Figures 5 and 6 show the number of fatal and total collisions by day of the week.
